Progress Report-4

I have completed the whole website and fixed the bugs on the website. Now the website is working for mobile, tablet, and laptop screen size. The website is responsive. For the design of the website, I used Adobe XD and images from Canva. VS code is used as my code editor during the making of the website. I have used bootstrap on the website. In the site, I have mentioned the copyright of the website. I have fulfilled all the requirement were asked to me. Below is the screenshot of the website in the laptop view and mobile view.

What's New
Highlights from the Chrome 84 update
The new Issues tab
The Issues tab aggregates warnings from the browser in a structured, aggregated, and actionable way, links to affected resources within DevTools, and provides guidance on how to fix the issues.
New accessibility information in the Inspect Mode tooltip
The tooltip now indicates whether an element has an accessible name and role and is keyboard-focusable.

All About food

July 18, 2020

Food is any substance consumed to provide nutritional support for an organism. Food is usually of plant or animal origin, and contains essential nutrients, such as carbohydrates, fats, proteins, vitamins, or minerals. The substance is ingested by an organism and assimilated by the organism's cells to provide energy, maintain life, or stimulate growth. Historically, humans secured food through two methods: hunting and gathering and agriculture, which gave modern humans a mainly omnivorous diet. Worldwide, humanity has created numerous cuisines and culinary arts, including a wide array of ingredients, herbs, spices, techniques, and dishes.

Healthy Food is Life Saver

July 18, 2020

Health food is a marketing term to suggest human health effects beyond a normal healthy diet required for human nutrition. Foods marketed as health foods may be part of one or more categories, such as natural foods, organic foods, whole foods, vegetarian foods or dietary supplements. These products may be sold in health food stores or in the health food or organic sections of grocery stores. While there is no precise definition for "health food", the United States Food and Drug Administration monitors and warns food manufacturers against labeling foods as having specific health effects when no evidence exists to support such statements.
